HAPPENS HERE
CUSTOM SOFTWARE ENGINEERING & BUSINESS PROCESS OPERATION

INNOVATION

ATHENS TECHNOLOGY CENTER
Apart from data and content migration services, we support physical and virtual-based databases migration to Cloud, deployment and sync workloads and also, perform testing and verification.

Exploit our extensive experience for objective advice and recommendations in project scoping and planning, business process and system design. We also offer training and knowledge transfer workshops.

We provide custom e-learning content development services that include subject-matter experts, instructional design, content development, content testing and support as well as content updates.

An extended team of experts offer you custom IT and development services:
- Web development
- UI/UX design services
- Mobile applications
- Enterprise Process Automation
- Workflow Management
- Data Insights & Business Intelligence

We make sure that your software solution is configured and implemented to meet your requirements on time and on budget. From planning to deployment phase, all tasks, deliverables and required sign-offs, are well-defined and documented.

Proven testing techniques and state-of-the-art tools and methodologies, ensure in-depth, comprehensive testing for validation and quality assurance purposes, along with reliability estimation.
- Functional testing
- Performance testing
- Mobile testing

System and application integration services for Cloud or On Premise solutions and 3rd-party systems that you wish to connect with your existing infrastructure.

WE COMBINE GLOBAL TALENT, KNOW-HOW AND STATE OF THE ART MODELING, IMPLEMENTATION AND INTEGRATION SERVICES TO DELIVER SOLID BUSINESS OUTCOMES AND HELP ORGANIZATIONS FLY.
Individual experts or dedicated development teams can support your in-house team on-demand, providing their technical expertise.

For IT outsourcing services:
An established team of full time professionals along with a big network of external partners, formulate an ecosystem of business and technical knowledge that will cover any aspect of your requirements.

- Project managers
- IT Business Analysts
- System & Infrastructure Architects
- Database Architects
- Software engineers
- Mobile Application Developers
- BI developers
- Software QA and Testing specialists
- System & Network Administrators
- UI/UX designers
- Creative Directors
- Web Designers

For e-Learning outsourcing services:
Instructional designers will help you set strategy and design the courses, while Content & Multimedia Designers/Developers will assemble course elements, develop multimedia and interactive components and create the courseware.

In addition, LMS and Virtual Classroom experts will assist you to set up your e-Learning system and libraries and will support throughout your project.

- PYTHON

**Platforms**
- SHAREPOINT
- DRUPAL
- WORDPRESS
- JOSMILLA
- DOT NET FRAME
- LIFECYCLE
- MONGODB
- IIS

**Database Systems**
- ORACLE
- POSTGRE SQL
- MYSQL
- MICROSOFT SQL
- DB2
- MONGODB

**Application Servers**
- ORACLE
- TOMCAT
- .NET
- JBOSS
- GLASSFISH
- IBM WEBSPHERE

**Web technologies**
- HTML
- JAVASCRIPT
- ASPH/.NET
- PHP
- REACT.JS

**Our Outsourcing services are based on technologies and platforms for backend, desktop, mobile, web services and database.**

**METHODOLOGY**

Broad applicability for managing and controlling iterative and incremental projects of all types.

Agile framework allows us to develop and release custom software in rapid cycles. Each incremental release builds on previous functionality and in time customer feedback while being thoroughly tested to ensure software quality.

**Iterative Delivery**

**Continuous Feedback**

**ITERATIVE DELIVERY**

**CONTINUOUS FEEDBACK**

**Increased communication & team ownership**

**Deployable products**

**Dynamic requirements**

**Iterative Planning**

**Adaptive teams**

**Continuous review & testing**
ATC has provided solutions to Gaming, Betting, Media and Banking organizations, focusing on the fields of Data/Content Management and Analysis, Human Capital & Enterprise Management and of Mobile Computing. The company maintains an active presence in the EU, the US, Central Europe, Middle East and North Africa for over 30 years.

Following Agile methodologies, ATC creates work teams configured to your specific needs and requirements, which will seamlessly co-operate with your home-based resources. Our extended expertise in web, mobile, cloud and database areas, secure a customized service that meets your technology strategy tightly.

• EXTENSIVE EXPERTISE IN GLOBAL, RESOURCE-CRITICAL MARKETS
• EU BASED
• TOP 10 EU SMES FOR R&D
• STRONG FINANCIAL RATING – ACCESS TO BUSINESS INSURANCE & FINANCING
• GLOBALLY COMPETITIVE TALENT POOL
• FLEXIBLE & AGILE; STRONG EMPHASIS ON CLIENT STRATEGY
• CHOICE OF BUSINESS, PROCESSOR PROJECT OUTSOURCING
• PREVENT COST RUN OVER
• BOOST ROI
Based on your planned budget and timeline of your project, we can support both “time-and-materials” pricing model or a fixed price contract.

**CUSTOM SOFTWARE DEVELOPMENT RESULTING TO SPIN OFF FOR OPEN BET UK**

OpenBet needed to increase resources in order to fulfill its growth strategy.

- Diversify Engineering Services provision towards lower-cost country with reduced talent attrition rates and overheads
- A staged approach, providing development, customer support, maintenance and new product design
- OpenBetTM acquired the team
- Development cost reduced by 50%
- Doubling of Margin for Customer support
- Annualized attrition rate 2.5%

**INTEGRATED USAGE ANALYTICS SOLUTION FOR ACADEMIC PUBLISHERS**

Implementation of Squid’s Bouquet platform, deployment of the Counter application & Usage Analytics Application in a visually appealing UI.

- Complete usage recording and analysis of the academic material distributed
- Better usage measurement and analysis of online collections to increase contract renewals with university libraries, enhance user experience and optimize product catalog
- Portal development & management services
- Visualized usage data through a user-friendly and friendly environment.
- Project Management and Quality Assurance services

**BUSINESS CONSULTING & CUSTOM SOLUTION DEVELOPMENT FOR ZOETIS**

Zoetis aimed to gain business intelligence on specific product’s performance. Insights were collected via the harmonization, aggregation and analysis of transactional data coming from 50 veterinarian practices.

Indicative metrics include:

- % Dogs on specific formulation
- Compliance levels with specific formulation for a variety of patients’ type/age
- Patients’ Loyalty
- Clinic Revenue comparison
- Cross-selling trends
- Competition overview on pricing
