Maritime companies face significant challenges. Every day, they carry the responsibility for the safety and wellbeing of their crew, the seaworthiness of their vessels and the immaculate condition and timely delivery of their cargo.

At the same time, they need to manage the expectations of a number of stakeholders, being their owners and investors, bankers, regulators and many others.

They also need to actively demonstrate their respect to the environment and their commitment to ethical business conduct. All this, while operating in highly volatile markets and facing significant and various external threats.

Indeed, maritime companies manage to navigate through many complexities and uncertainties. However, accounting and financial reporting shouldn't be amongst them.
