

## **GoGreen, a member of the KANTOR Management Consultants Group, assigned ATC with the development of domain-specific platform**

Athens, March 19<sup>th</sup>, 2024

**[Athens Technology Center \(ATC\)](#) undertook the design, development, operation, maintenance, and update of a new online informative platform on behalf of GoGreen, which offers a holistic support and specialized services for funding programs. GoGreen is an affiliated company to [Kantor Management Consultants Group](#).**

Specifically, through a customized platform, GoGreen provides concrete and updated information on the upcoming funded project "Energy Saving Program for Businesses". Except for providing information about the program, the platform provides the following services to the users: a) an innovative pre-screening control on the eligibility criteria of their application, b) the ability to assess the current and future energy class of their property, c) the ability to estimate the percentage of energy saving that they can achieve through the program and d) information on the percentage of the fund that they are eligible for.

For that matter, Kantor designed advanced algorithms that ATC integrated into the platform's design.

Kantor chose to assign the platform development to ATC because of their long-term successful cooperation and ATC's technical expertise in delivering user-friendly platforms on time and on budget. ATC had developed tailor-made algorithms to achieve the required estimation, for which Kantor owns the copyright. The platform brings the user in contact with an experienced GoGreen representative, providing the opportunity to book an appointment based on the availability of the user.
