

Fact checking for Public Sector Institutions

Do you see your institution being threatened unfairly by fake news, in a manner that doesn't allow your best work to become known to the public?

Do you need to prevent social unrest resulted by disinformation?

Do you want to boost your status and reputation, by being recognized as an institution that pushes truth in society?

Then you need to invest in a full-scale observatory against disinformation!

What is it that you get?

- ✓ Long standing expertise in setting up country wide observatories
- ✓ Collaborative platform for content verification
- ✓ In-built fact checking tools, resulting from high end research
- ✓ Media literacy content and strategy outline
- ✓ Website consisting of all the activities of the hub
- ✓ Social media mapping and visualization tools
- ✓ Focused knowledge repository
- ✓ Operation continuity report
- ✓ Training by experienced professionals & technological support

What do you achieve?

- Showcase debunking responsiveness
- Sensitize public on severity of possible issue
- Access to repository of known-fakes
- Increase prestige of the state and its institutions
- Deepen democracy through upgrade of public dialogue
- Protection from malicious attacks which aim to influence public opinion
- Option to keep operation of hub after the development
