

# Manufacturing ERP

## Single source of truth

ATHENS TECHNOLOGY CENTER

**EPICOR**

Authorized Partner

### Integrated Product Data Management (PDM)

The system serves as the definitive source for product builds by pulling data from CAD and PLM systems, ensuring accurate Methods of Manufacturing (MoM), Bills of Materials (BOM), and Routing.

### Real-time Visibility

By centralizing data from the shop floor to the top floor, Kinetic provides a shared, accurate view of jobs, inventory, and financials, reducing manual data entry and preventing discrepancies.

### Configurator & Part Management

Epicor CPQ (Configure Price Quote) works within Kinetic to automatically create MOMs and part revisions based on customer requirements, keeping the ERP as the source of truth for custom part configuration.

### Supply Chain & Supplier Management

Epicor extends its reach to direct suppliers, providing a unified dashboard for purchasing to track every PO from creation to receipt, reducing manual work and improving procurement accuracy.

### Unified Digital Commerce

Easily connect eCommerce channels directly with the ERP, ensuring that inventory, pricing, and customer order data are synchronized in real-time, eliminating overselling or outdated information.

### Manufacturing Intelligence

Epicor Advanced MES can connect to machines to send production data directly to the ERP, offering a single source of truth for production scheduling, quality management, and performance analytics.

By leveraging Epicor Kinetic, manufacturers can make more accurate estimates and improve production effectiveness through dependable, consistent data.
